

### Boiling Points of Cannabis Terpenoids

Cannabis Constituent Structure	Concentration	Boiling Point	Properties
d-limonene 	0.14%	177°C	Immune potentiator Antidepressant Antimutagenic
β-caryophyllene 	0.05%	119°C	Antiinflammatory Cytoprotective (gastric mucosa) Antimalarial
linalool 	0.002%	198°C	Sedative Antidepressant Anxiolytic Immune potentiator
β-myrcene 	0.47%	166-168°C	Analgesic Antiinflammatory Antibiotic Antimutagenic
α-pinene 	0.04%	156°C	Antiinflammatory Bronchodilator Stimulant Antibiotic Antineoplastic AChE inhibitor
1,8-cineole (eucalyptol) 	> 0.001%	176°C	AChE inhibitor Increases cerebral blood flow Stimulant Antibiotic Antiviral Antiinflammatory Antinociceptive
