

Boiling Points of Cannabis Terpenoids

Cannabis Constituent Structure	Concentration	Boiling Point	Properties
<p>d-limonene</p> 	0.14%	177°C	Immune potentiator Antidepressant Antimutagenic
<p>β-caryophyllene</p> 	0.05%	119°C	Antiinflammatory Cytoprotective (gastric mucosa) Antimalarial
<p>linalool</p> 	0.002%	198°C	Sedative Antidepressant Anxiolytic Immune potentiator
<p>β-myrcene</p> 	0.47%	166-168°C	Analgesic Antiinflammatory Antibiotic Antimutagenic
<p>α-pinene</p> 	0.04%	156°C	Antiinflammatory Bronchodilator Stimulant Antibiotic Antineoplastic AChE inhibitor
<p>1,8-cineole (eucalyptol)</p> 	> 0.001%	176°C	AChE inhibitor Increases cerebral blood flow Stimulant Antibiotic Antiviral Antiinflammatory Antinociceptive
